

Extraction Template for Qualitative & Quantitative Observational Reports

Record id:

Complete citation:

Author affiliations, including discipline and institution:

Funding source(s) with grant #(s):

Citations to reports from the same parent study:

Citations to potentially relevant reports from the reference list:

Period of data collection:

Geographic location of study:

Index child condition(s):

Research purpose, questions, and/or hypotheses:

Theoretical framework:

Study design:

Power analysis:

Demographics of index children:

N:

% Male:

% Female:

Age range:

Mean age:

Disease severity (any indicator):

Race/ethnicity (specify % each category):

Additional demographics, clinical information, non family-related descriptive findings:

Demographics of mothers:

N:

Age range:

Mean age:

Race/ethnicity (specify % each category):

Education:

Income:

Employment:

Marital status:

Additional demographics, clinical information, non family-related descriptive findings:

Demographics of fathers:

N:

Age range:

Mean age:

Race/ethnicity (specify % each category):

Education:

Income:

Employment:

Marital status:

Additional demographics, clinical information, non family-related descriptive findings:

Other family members:

For each category specify:

N:

Age range:

Mean age:

Race/ethnicity (specify % each category):

Education:

Income:

Employment:

Marital status:

Additional demographics, clinical information, non family-related descriptive findings:

If relevant, other family or parent demographics:

Family structure:

% 1-parent:

% 2-parent:

% other:

Demographics of other study participants (e.g., providers):

Inclusion criteria:

Exclusion criteria:

Recruitment site(s):

Inpatient setting

Outpatient primary care setting

Outpatient specialty care setting

Home

School

Other (specify):

Data collection site(s):

Inpatient setting

Outpatient primary care setting

Outpatient specialty care setting

Home

School

Other (specify):

Data Collection:

For each measure or technique:

Name, citation, domains assessed:

N of each family member:

Timing of measure:

Results:

Overall appraisal:

Primary reviewer & review date:

Secondary reviewer & review date:
